

FlexFix™

Finding holes in your previously applied rubber surface? FlexGround can quickly and easily repair minor and major damage. Small repairs can be made in various designs and colors (triangles, circles, happy faces etc) in order to create the appearance that the repaired area was part of the original design.

MAINTENANCE

FlexTop™

FlexTop is the solution for widespread and severely damaged rubber. It consists of reapplying the EPDM or TPV top surface (and cushioning where needed). FlexTop will be applied ½" thick over top of the existing rubber to conceal any age and maintain or improve critical fall.
