

PolySplash™

AQUATIC SURFACING

PolySplash from FlexGround is an aquatic surface innovation that provides a slip-resistant surface for play and splash pad activity. PolySplash is the most durable, chlorine-resistant, and UV stable surfacing on the market. This system is the perfect blend of aesthetics and structure. PolySplash can be installed over concrete, asphalt, non-coated wood, pattern raw metal, rubber, foam, and many other surfaces. PolySplash is perfect for splash pads, pool decks, interiors and beach entries.

Advantages:

- System comprised of TPV rubber and a liquid rubber composite
- Non-porous
- Slip-resistant
- Extremely durable
- Many color choices
- Resistant to rotting, cracking, and peeling
- Anti-microbial
- Soft and flexible rubber feel
