

Robertson Recreational Surfaces

PRODUCT SPECIFICATION

Geotextile Fabric

Geotextile fabric is used with Tot Turf surfacing to separate the surfacing from the drainage system. It provides a water permeable barrier to hold the surfacing in place and prevent the drainage system from being clogged.

Physical Properties

Thickness	28 mils (minimum)
Water permeability (minimum)	26 gallons/sq. ft. /minute (minimum)

Warranty

All Geotextile products are warranted to be free of defects in material and workmanship for the life of the product. Geotextile will not deteriorate under normal soil conditions.

Tot Turf will replace any Geotextile fabric found to be defective at no cost to the customer.
