

Rubber J-Curb

Rubber J-Curbs provide a flexible, attenuating border for poured rubber installations. The specialty engineered curb works to lock poured surfaces into place and provides an attractive solution for edging. Comprised of 100% recycled waste stream content, these borders and curbs are flexible enough to make various shapes and curves for the freedom of design and customization.

Made with 100% Recycled Rubber

- S2" drainage outlets built into the edge to improve drainage
- Flexible to allow for making various curves and shapes
- Each section is 8'
- Available in Black color
- Great solution for unitary, poured rubber surfacing on playgrounds
