

Interlocking Rubber Tile

Color Options

Buffing Top: Pigmented using organic powder color coating methods that will not delaminate over time. Sealed with specially formulated polymer agent that bonds pigments to the rubber

EPDM Top: Gezoflex EPDM granules from Gezolan are used to create options from bright solids to special blends for themes. Mixtures include a vibrant 90% EPDM/10% black mesh for standout solids, a 50/50 mix with black mesh, and 3-color mixes.
